PTO DRIVE SHAFT SIZES – TABLE OF POWER RATINGS

Basis of calculation:

- 1 Standard joint (G) Joint angle 5° – Life 1000 h
Wide-angle joint (WWG) Joint angle 10° – Life 1000 h
- 2 Standard joint (G) Joint angle 10° – Life 100 h
Wide-angle joint (WWG) Joint angle 18° – Life 100 h

G	Standard joint
WWG 80°	Wide-angle joint 80°

Size	Limit values		Dynamic capacity			
	Ms [Nm] (inlb)	Mp [Nm] (inlb)	1 540 min ⁻¹ 1000 min ⁻¹		2 540 min ⁻¹ 1000 min ⁻¹	
			P [kw] (HP)	Mn [Nm] (inlb)	P [kw] (HP)	Mn [Nm] (inlb)

PTO DRIVE SHAFT GUARD

Walterscheid PTO drive shafts are equipped with an integrated PTO drive shaft guard which complies with the international safety regulations.

The different requirements are met by a unit construction system. The guard types available are SC and SD. In comparison to the SC guard, the SD

design satisfies the additional radial loading test requirements according to ISO 5674 and French decree 81293.

WIDE-ANGLE PTO DRIVE SHAFT GUARD SD

Owing to the guard's special position, the joint remains fully protected under any bend angle. Even under large angles, no contact is established with the rotating joint.

We reserve the right to change design without prior consultation. Use products only for specified applications. We only guarantee a constant quality. Reproduction, even in part, is only authorized with the written consent of GKN Walterscheid GmbH.
